

To Whom It May Concern,

DREAM REIT is one of Canada's leading real estate companies. The scope of our business includes real estate land development, housing and condominium development, asset management & management services for four TSX-listed funds, investments in and management of Canadian renewable energy infrastructure and commercial property ownership. We believe in contributing in the communities where we live and where we work and value the commitment of others.

Since 2011, PL Consulting has performed Energy Audits in our portfolio, on time and on budget.

The results of these audits proved valuable when assessing where to direct Capital Investment within our portfolio. PL Consulting has played a vital role in implementing many required upgrades and repairs, while capturing all possible incentives & rebates available in the province for the related work.

Specifically, PL has been of the utmost assistant in implementing Heating & Cooling projects, supported by their Building Automation System software.

PL has shown the utmost professional behavior through their service and project operations, and I will continue to utilize their expertise for future projects.

Please do not hesitate to contact me direct with any questions or concerns.

Regards,
